HOME OPENING BAL INFLOW OUTFLOW MONTH DATA REPORTS CONTACT US

Welcome to IISFM Rapid Foodgrain Reporting Service (RFR) of FCI

This single screen utility is the miniature version of IISFM Module and has been introduced to rapidly enable the FCI management and the Ministry of Food & Consumer Affairs to generate basic reports online for taking policy decisions.

On this screen all the depots are expected to feed data for getting depot-wise daily stock position of foodgrains and sugar in central pool and commodity-wise daily off-take positions under different schemes. Crop-year-wise data entry for all commodity groups with variety, Issuable/Non-issuable categories is also provisioned once in a month on last day.

The District Offices are expected to post the stock figures lying in Mandies and available with State agencies in Central Pool on monthly basis.

Steps for data entry

1. First, the Depots have to enter the opening balances.
2. Then all receipts, S/T gains, scheme-wise issues, dispatches, S/T losses are to be recorded.
3. This module will accept single entry for a date for daily entry.
4. Before posting the final data, it needs to check the correctness of stock figures.
5. For further help, [click here](#)....

Warning : There is no opening balance figures available for any commodity and crop year for this depot.

Date of Stocks being Reported :

Reporting Personnel and Designation :

Date of Last Daily Reporting : -NA-

Date of Last Monthly Reporting :

Tick and Submit in case of 'No Transactions':
